***Proceedings of the Seventh International Conference on Information Fusion***

**28 June - 1 July 2004**  
**Stockholm Sweden**

## Table of contents

**Preface**, pp. i-xii

[General Chair's Message](#)  
[ISIF President's Message](#)  
[Technical Program Chair's Message](#)  
[Organization Committee](#)  
[Technical Program Committee](#)  
[Best Paper Award](#)

**[INV1] Invited Lecture 1**

Chair: Stefan Arnborg, Royal Institute of Technology, Sweden

[Random Sets: Unification and computation for information fusion-A retrospective assessment](#), pp. 1-20

Ronald P. Mahler, Lockheed Martin MS2 Tactical Systems, USA

**[BST] Best paper presentation**

Chair: Per Svensson, Swedish Defence Research Agency, Sweden

[Decision fusion in a wireless sensor network with a large number of sensors](#), pp. 21-27

Ruixin Niu, Syracuse University, USA  
Prmod K. Varshney, Syracuse University, USA  
Michael Moore, Alphatech, USA  
Dale Klamer, Alphatech, USA

**[TRK1] Tracking 1**

Chair: Thiagalingam Kirubarajan, McMaster University, Canada

[Target track initiation, comparison and optimization](#), pp. 28-32  
Darko Musicki, University of Melbourne, Australia  
Sofia Suvorova, Defence Science and Technology Organisation, Australia

[Multi-hypothesis sonar tracking](#), pp. 33-40  
Stefano Coraluppi, NATO Undersea Research Centre, Italy  
Craig Carthel, NATO Undersea Research Centre, Italy

[Viterbi data association tracking using amplitude information](#), pp. 41-45  
Barbara F. La Scala, University of Melbourne, Australia

#### **[BEL1] Belief functions 1**

Chair: Rolf Haenni, University of Konstanz, Germany

[Kalman filter and joint tracking and classification in the TBM framework](#), pp. 46-53  
Philippe Smets, Université libre de Bruxelles, Belgium  
Branko Ristic, Defence Science and Technology Organisation, Australia

[A Data Fusion System for Object Recognition based on Transferable Belief Models and Kalman Filters](#), pp. 54-61  
Gavin Powell, Cardiff University, UK  
Dave Marshall, Cardiff University, UK  
Richard Milliken, BAe Systems, UK  
Keith Markham, BAe Systems, UK

[A comparative analysis of two approaches using the road network for tracking ground targets](#), pp. 62-69  
Stéphane Gattein, EADS France, France  
Patrick Vannoorenberghe, Université de Rouen, France

#### **[LRN] Learning**

Chair: Taek Lyul Song, Hanyang University, Korea

[Iterative k-means algorithm based on Fisher discriminant](#), pp. 70-73  
Mantao Xu, University of Joensuu, Finland  
Pasi Fränti, University of Joensuu, Finland

[Co-operative training in classifier ensembles](#), pp. 74-78  
Nayer Wanas, University of Waterloo, Canada  
Rozita Dara, University of Waterloo, Canada  
Mohamed S. Kamel, University of Waterloo, Canada

[Multitask learning using partial least square method](#), pp. 79-84  
Wen-Cong Lu, Shanghai University, P.R. China  
Nian-Yi Chen, Shanghai University, P.R. China  
Guo-Zheng Li, Shanghai Jiao Tong University, P.R. China  
Jie Yang, Shanghai Jiao Tong University, P.R. China

#### **[DES] Detection & Estimation**

Chair: Yvo Boers, Thales Nederland, The Netherlands

[Fusion of detections in a multi-carrier GPS receiver](#), pp. 85-90  
Stanislas Boutoille, Laboratoire d'Analyse des Systèmes du Littoral, France  
Serge Reboul, Laboratoire d'Analyse des Systèmes du Littoral, France  
Mohammed Benjelloun, Laboratoire d'Analyse des Systèmes du Littoral, France

[On 'negative' information in tracking and sensor data fusion: discussion of selected examples](#), pp. 91-98  
Wolfgang Koch, FGAN, Germany

[Fault detection by desynchronized Kalman filtering, introduction to robust estimation](#), pp. 99-106  
Olivier Bilenne, Multitel A.S.B.L., Belgium

#### **[ATC] New Trends in Data Fusion Algorithms for ATC Applications (Special session)**

Chair: Jesús García, Universidad Carlos III de Madrid, Spain, José M. Molina, Universidad Carlos III de Madrid, Spain, Juan A. Besada, Universidad Politécnica de Madrid, Spain

[Analysis of data fusion architectures and techniques in the development of an A-SMGCS Surveillance prototype](#), pp. 107-114

José M. Molina, Universidad Carlos III de Madrid, Spain  
Jesús García, Universidad Carlos III de Madrid, Spain  
José R. Casar, Universidad Politécnica de Madrid, Spain

[On-line bias estimation of secondary radar networks for ATC](#), pp. 115-122

A. Soto Jaramillo, Universidad Politécnica de Madrid, Spain  
J.A. Besada Portas, Universidad Politécnica de Madrid, Spain  
J.R. Casar Corredera, Universidad Politécnica de Madrid, Spain  
J.I. Portillo García, Universidad Politécnica de Madrid, Spain

[A machine-learning approach to multiple-detection data association for ASDE radar](#), pp. 123-129

Jesús García, Universidad Carlos III de Madrid, Spain  
Antonio Berlanga, Universidad Carlos III de Madrid, Spain  
José M. Molina, Universidad Carlos III de Madrid, Spain  
Gonzalo de Miguel, Universidad Politécnica de Madrid, Spain

## **[TRK2] Tracking 2**

Chair: Yaakov Bar-Shalom, University of Connecticut, USA

[Joint IMM and coupled PDA to track closely spaced targets and to avoid track coalescence](#), pp. 130-137

Henk A.P. Blom, National Aerospace Laboratory NLR, The Netherlands  
Edwin A. Bloem, National Aerospace Laboratory NLR, The Netherlands

[UKF controlled variable-structure IMM algorithms using coordinated turn models](#), pp. 138-145

Felix Opitz, EADS Deutschland, Germany  
Thomas Kausch, EADS Deutschland, Germany

[Integrated tracking splitting filter for manoeuvring targets](#), pp. 146-152

Darko Musicki, University of Melbourne, Australia  
Barbara F. La Scala, University of Melbourne, Australia  
Robin J. Evans, University of Melbourne, Australia

## **[BEL2] Belief functions 2**

Chair: Stefan Arnborg, Royal Institute of Technology, Sweden

[A general model for partially reliable information sources](#), pp. 153-160

Rolf Haenni, University of Konstanz, Germany  
Stephan Hartmann, London School of Economics, UK

[Effective ATR algorithms using information fusion models](#), pp. 161-166

Arnaud Martin, ENSIETA, E3I2, France  
Emanuel Radoi, ENSIETA, E3I2, France

[Decentralised fusion of disparate identity estimates for shared situation awareness](#), pp. 167-174

Martin G. Oxenham, Defence Science and Technology Organisation, Australia  
Subhash Challa, University of Melbourne, Australia  
Mark R. Morelande, University of Melbourne, Australia

## **[AGT] Agents**

Chair: Tom Ziemke, University of Skövde, Sweden

[Approximate databases and query techniques for agents with heterogeneous perceptual capabilities](#), pp. 175-182

Patrick Doherty, University of Linköping, Sweden  
Witold Lukaszewicz, University of Economics and Computer Science, Poland  
Andrzej Szalas, University of Economics and Computer Science, Poland

[Simulating the navigation and control of autonomous agents](#), pp. 183-189

Erol Gelenbe, Imperial College, UK  
Varol Kaptan, Imperial College, UK  
Khaled Hussain, University of Central Florida, USA

[Sensor scheduling using intelligent agents](#), pp. 190-197

René Thaens, Delft University of Technology, The Netherlands

## **[SYS1] Systems 1**

Chair: Sten F. Andler, University of Skövde, Sweden

[\*An active memory as a model for information fusion\*](#), pp. 198-205

Sebastian Wrede, Bielefeld University, Germany  
Marc Hanheide, Bielefeld University, Germany  
Christian Bauckhage, Bielefeld University, Germany  
Gerhard Sagerer, Bielefeld University, Germany

[\*Multitarget tracking in a multisensor multiplatform environment\*](#), pp. 206-213

A. Gad, Royal Military College of Canada, Canada  
M. Farooq, Royal Military College of Canada, Canada  
J. Serdula, Royal Military College of Canada, Canada  
D. Peters, Royal Military College of Canada, Canada

[\*Simulation framework for collaborative fusion research\*](#), pp. 214-218

Tobias Horney, Swedish Defence Research Agency, Sweden  
Mikael Brännström, Swedish Defence Research Agency, Sweden  
Mathias Tyskeng, Swedish Defence Research Agency, Sweden  
Johan Mårtensson, Swedish Defence Research Agency, Sweden  
GeeWah Ng, DSO National Laboratories, Singapore  
Mark Gossage, DSO National Laboratories, Singapore  
WeeSze Ong, DSO National Laboratories, Singapore  
HueyTing Ang, DSO National Laboratories, Singapore  
KheeYin How, DSO National Laboratories, Singapore

### **[AFI1] AFOSR Info Fusion Program 1 (Special session)**

Chair: Allen M. Waxman, Alphatech, USA John Tangney, AFOSR, USA

[\*Building a framework for situation awareness\*](#), pp. 219-226

John Salerno, AF Research Laboratory, USA  
Michael Hinman, AF Research Laboratory, USA  
Douglas Boulware, AF Research Laboratory, USA

[\*Synchronization of dynamic networks for knowledge representation and higher-level fusion\*](#), pp. 227-234

Neil A. Bomberger, Alphatech, USA  
Allen M. Waxman, Alphatech, USA  
Felipe M. Pait, Alphatech, USA

[\*Self-organizing hierarchical knowledge discovery by an ARTMAP image fusion system\*](#), pp. 235-242

Gail A. Carpenter, Boston University, USA  
Siegfried Martens, Boston University, USA  
Ogi J. Ogas, Boston University, USA

### **[TRK3] Tracking 3**

Chair: Alfonso Farina, AMS, Italy

[\*Multisensor-multitarget bias estimation for general asynchronous sensors\*](#), pp. 243-250

Xiangdong Lin, University of Connecticut, USA  
Yaakov Bar-Shalom, University of Connecticut, USA  
Thiagalingam Kirubarajan, McMaster University, Canada

[\*An overbounding ellipse approach for set based tracking with range-bearing measurements\*](#), pp. 251-257

Fiona Fletcher, Defence Science and Technology Organisation, Australia  
M. Sanjeev Arulampalam, Defence Science and Technology Organisation, Australia

[\*Tracking with dissimilar sensors for linear system in case of arbitrary correlated noises\*](#), pp. 258-263

Anmin Zhang, Xi'an Jiaotong University, P.R. China  
Chongzhao Han, Xi'an Jiaotong University, P.R. China

### **[BEL3] Belief functions 3**

Chair: Philippe Smets, Université libre de Bruxelles, Belgium

[\*Segmentation of brain tumors by evidence theory: on the use of the conflict information\*](#), pp. 264-271

Anne-Sophie Capelle, Université de Poitiers, France  
Christine Fernandez-Maloigne, Université de Poitiers, France

Olivier Colot, Université des Sciences et Technologies de Lille, France

[Adaptive fuzzy evidential reasoning for automated brain tissue segmentation](#), pp. 272-279

Hongwei Zhu, University of Waterloo, Canada

Otman Basir, University of Waterloo, Canada

[Extended discounting scheme for evidential reasoning as applied to MS lesion detection](#), pp. 280-287

Hongwei Zhu, University of Waterloo, Canada

Otman Basir, University of Waterloo, Canada

### **[DMI] Data Mining**

Chair: Erland Jungert, Swedish Defence Research Agency, Sweden

[Incorporating external data into data warehouses - problems identified and contextualized](#), pp. 288-294

Mattias Strand, University of Skövde, Sweden

Benkt Wangler, University of Skövde, Sweden

[Accuracy vs. comprehensibility in data mining models](#), pp. 295-300

Ulf Johansson, University of Borås, Sweden

Lars Niklasson, University of Skövde, Sweden

Rikard König, University of Borås, Sweden

[Co-evolutionary data mining in phase space for robust fuzzy resource management](#), pp. 301-307

James F. Smith III, Naval Research Laboratory, USA

### **[SYS2] Systems 2**

Chair: William D. Blair, GeorgiaTech Research Institute, USA

[Data fusion development concepts within complex surveillance systems](#), pp. 308-315

Felix Opitz, EADS Deutschland, Germany

Werner Henrich, EADS Deutschland, Germany

Thomas Kausch, EADS Deutschland, Germany

[Extraction of aligned video and radio information for identity and location estimation in surveillance systems](#), pp. 316-321

Luca Marchesotti, University of Genova, Italy

Reetu Singh, University of Genova, Italy

Carlo Regazzoni, University of Genova, Italy

[Belief-evidence fusion in a hybrid intelligent system](#), pp. 322-329

Nelson Marcos, De La Salle University, Philippines

Arnulfo Azcarraga, De La Salle University, Philippines

### **[AFI2] AFOSR Info Fusion Program 2 (Special session)**

Chair: Allen M. Waxman, Alphatech, USA John Tangney, AFOSR, USA

[Crisis management in a data fusion synthetic task environment](#), pp. 330-337

Peter D. Scott, State University of New York at Buffalo, USA

Galina L. Rogova, Encompass Consulting, USA

[Terrain based information fusion and inference](#), pp. 338-345

Robin Ginton, Carnegie Mellon University, USA

Sean Owens, Carnegie Mellon University, USA

Joe Giampapa, Carnegie Mellon University, USA

Katia Sycara, Carnegie Mellon University, USA

Chuck Grindle, University of Pittsburgh, USA

Mike Lewis, University of Pittsburgh, USA

[Multi-agent information fusion: methodology, architecture and software tool for learning of object and situation assessment](#), pp. 346-353

Vladimir Gorodetsky, SPIIRAS, Russia

Oleg Karsaev, SPIIRAS, Russia

Igor Kottenko, SPIIRAS, Russia

Vladimir Samoilov, SPIIRAS, Russia

### **[TRK4] Tracking 4**

Chair: Egils Sviestins, Saab, Sweden

[\*Bounds for aircraft tracking using a hydrophone array\*](#), pp. 354-361

F. Rice, Adelaide University, Australia

D.A. Gray, Adelaide University, Australia

I.S.D. Solomon, Defence Science and Technology Organisation, Australia

[\*Adaptive Kalman filtering based on matched filtering of the innovations sequence\*](#), pp. 362-369

Wolfgang Niehsen, Robert Bosch, Germany

[\*Circular filters for target tracking in 3D\*](#), pp. 370-376

Dirk Tenne, State University of New York at Buffalo, USA

Tarunraj Singh, State University of New York at Buffalo, USA

[\*Optimal fusion algorithm based on multi-sensor tracking\*](#), pp. 377-383

Shiqiang Hu, Shanghai Jiao Tong University, P.R. China

Zhongliang Jing, Shanghai Jiao Tong University, P.R. China

Henry Leung, University of Calgary, Canada

### **[PDX] Applications and advances of plausible and paradoxical reasoning for data fusion (Special session)**

Chair: Jean Dezert, ONERA, France Florentin Smarandache, University of New Mexico, USA

[\*The generalized pignistic transformation\*](#), pp. 384-391

Jean Dezert, ONERA, France

Florentin Smarandache, University of New Mexico, USA

Milan Daniel, Academy of Sciences of the Czech Republic, Czech Republic

[\*Target tracking with generalized data association based on the general DSm rule of combination\*](#), pp. 392-399

Albena Tchamova, Bulgarian Academy of Sciences, Bulgaria

Jean Dezert, ONERA, France

Tzvetan Semerdjiev, Bulgarian Academy of Sciences, Bulgaria

Pavlina Konstantinova, Bulgarian Academy of Sciences, Bulgaria

[\*Neutrosophy in situation analysis\*](#), pp. 400-406

Anne-Laure Jousset, Defence Research and Development Canada, Canada

Patrick Maupin, Defence Research and Development Canada, Canada

[\*Robust Bayesianism: imprecise and paradoxical reasoning\*](#), pp. 407-414

Stefan Arnborg, Royal Institute of Technology, Sweden

### **[OTL] Ontology & Category Theory**

Chair: Mieczyslaw M. Kokar, Northeastern University, USA

[\*Use cases for ontologies in information fusion\*](#), pp. 415-421

Mieczyslaw M. Kokar, Northeastern University, USA

Christopher J. Matheus, Versatile Information Systems, USA

Kenneth Baclawski, Northeastern University, USA

Jerzy A. Letkowsky, Western New England College, USA

Michael Hinman, Air Force Research Laboratory, USA

John Salerno, Air Force Research Laboratory, USA

[\*Plan ontology and its applications\*](#), pp. 422-428

Lee Chew Hung, DSO National Laboratories, Singapore

Lee Hian Beng, DSO National Laboratories, Singapore

Ng Gee Wah, DSO National Laboratories, Singapore

How Khee Yin, DSO National Laboratories, Singapore

[\*Fusion and integration: What's the difference?\*](#), pp. 429-434

Mark E. Oxley, Air Force Institute of Technology, USA

Steven N. Thorsen, Air Force Institute of Technology, USA

[\*Comparing fusors within a category of fusors\*](#), pp. 435-441

Steven N. Thorsen, Air Force Institute of Technology, USA

Mark E. Oxley, Air Force Institute of Technology, USA

### **[SIG] Signal Processing**

Chair: Fredrik Gustafsson, Linköping University, Sweden

[Tracking and voice separation of moving speakers based on IMM-PDA filters](#), pp. 442-448  
Ilyas Potamitis, University of Patras, Greece  
Nikos Fakotakis, University of Patras, Greece

[Fusion of spectrograph and LPC analysis for word recognition: a new fuzzy approach](#), pp. 449-454  
Reza HoseinNezhad, Swinburne University of Technology, Australia  
Behzad Moshiri, University of Tehran, Iran  
Parisa Eslambolchi, University of Tehran, Iran

[Gate volume estimation for target tracking](#), pp. 455-462  
Darko Musicki, University of Melbourne, Australia  
Mark R. Morelande, University of Melbourne, Australia

[Multisite ultra-wideband radar systems with information fusion: some principal features](#), pp. 463-470  
V. Chernyak, State Technical University, Russia

**[AFI3] AFOSR Info Fusion Program 3 (Special session)**

Chair: Allen M. Waxman, Alphatech, USA John Tangney, AFOSR, USA

[Bottom-up clustering and top-down shattering of scale-free environments for information fusion](#), pp. 471-478  
András Lorincz, Eötvös Loránd University, Hungary  
Bálint Gábor, Eötvös Loránd University, Hungary  
Sándor Mandusitz, Eötvös Loránd University, Hungary  
Zsolt Palotai, Eötvös Loránd University, Hungary

[Decentralized data fusion and control in active sensor networks](#), pp. 479-486  
Alexei Makarenko, University of Sydney, Australia  
Hugh F. Durrant-Whyte, University of Sydney, Australia

[Fusion-based knowledge logistics in network-centric environment: intelligent support of OOTW operations](#), pp. 487-494  
Alexander Smirnov, Russian Academy of Sciences, Russia  
Michael Pashkin, Russian Academy of Sciences, Russia  
Nikolai Chilov, Russian Academy of Sciences, Russia  
Tatiana Levashova, Russian Academy of Sciences, Russia  
Andrew Krizhanovsky, Russian Academy of Sciences, Russia

[Mean field theory in density estimation using support vector machines](#), pp. 495-501  
Refaat M. Mohamed, University of Louisville, USA  
Aly A. Farag, University of Louisville, USA Wednesday 30 June

**[INV2] Invited Lecture 2**

Chair: Fredrik Gustafsson, Linköping University, Sweden

[Beyond the Kalman filter: particle filters for tracking applications](#), p. 502  
Neil J. Gordon

**[NLF1] Non-linear filtering 1**

Chair: Alain Appriou, ONERA, France

[A study of a nonlinear filtering problem for tracking an extended target](#), pp. 503-509  
Branko Ristic, Defence Science and Technology Organisation, Australia  
David J. Salmond, Qinetiq, UK

[Intra-ping timing issues in multistatic sonar tracking](#), pp. 510-517  
Stefano Coraluppi, NATO Undersea Research Centre, Italy  
Doug Grimmer, NATO Undersea Research Centre, Italy

[A stable total least square adaptive algorithm for the nonlinear Volterra filter](#), pp. 518-522  
Xiangyu Kong, Xi'an Jiaotong University, P.R. China  
Chongzhao Han, Xi'an Jiaotong University, P.R. China  
Ruixuan Wei, Air Force Engineering University, P.R. China

**[PNL1] Panel discussion on Challenges in Higher Level Fusion: Unsolved, Difficult, and Misunderstood Problems/Approaches in Levels 2-4 Fusion Research**

[Panel discussion challenges in higher level fusion: unsolved, difficult, and misunderstood problems/approaches in levels 2-4 fusion research](#), pp. 523-541

Organizer: Ivan Kadar, Interlink Systems Sciences, USA

Moderators: Ivan Kadar, Interlink Systems Sciences, USA, Per Svensson, Swedish Defence Research Agency, Sweden

Participants:

*Information fusion as enabling technology for network based defence*, pp. 524-525  
Per Svensson, Swedish Defence Research Agency, Sweden

*Challenges in high level information fusion*, pp. 526-527  
Joachim Biermann, FGAN, Germany

*The curse of JDL*, pp. 528-529  
Henrik I. Christensen, Royal Institute of Technology, Sweden

*Unification across JDL data fusion levels 1 and 2*, pp. 530-532  
Alan Steinberg, Utah State University, USA

*Situation awareness: issues and challenges*, pp. 533-534  
Mitch M. Kokar, Northeastern University, USA

*The levels 2, 3, 4 fusion challenge: fundamental statistics*, pp. 535-536  
Ronald P. Mahler, Lockheed Martin Tactical Systems, USA

*Issues and challenges in distributed sensor fusion: connection-resource management aspects*, pp. 537-539  
Ivan Kadar, Interlink Systems Sciences, USA

*Reusability, scalability, and quality in higher-level fusion processing*, pp. 540-541  
James Llinas, State University of New York at Buffalo, USA

#### **[IMF1] Image fusion 1**

Chair: Pramod K. Varshney, Syracuse University, USA

[New quality measures for image fusion](#), pp. 542-546  
Gemma Piella, Polytechnical University of Catalonia, Spain

[Feature space optimization prior to fuzzy image classification](#), pp. 547-554  
François Leduc, Defence Research and Development Canada, Canada

[Region-based image fusion using complex wavelets](#), pp. 555-562  
J.J. Lewis, University of Bristol, UK  
R.J. O'Callaghan, University of Bristol, UK  
S.G. Nikolov, University of Bristol, UK  
D.R. Bull, University of Bristol, UK  
C.N. Canagarajah, University of Bristol, UK

#### **[CLA1] Classification 1**

Chair: Dan Strömberg, Swedish Defence Research Agency, Sweden

[Choosing classifiers for decision fusion](#), pp. 563-568  
Kai F. Goebel, GE Global Research, USA  
Weizhong Yan, GE Global Research, USA

[Comparison of fusion algorithms based on logistic model of correlated classifiers](#), pp. 569-575  
So Young Sohn, Yonsei University, Korea  
Yoon Seong Kim, Yonsei University, Korea

[Using hierarchical HMMs in dynamic behavior modelling](#), pp. 576-582  
Shih-Yang Chiao, Lancaster University, UK  
Costas S. Xydeas, Lancaster University, UK

#### **[NLF2] Non-linear filtering 2**

Chair: Branko Ristic, Defence Science and Technology Organisation, Australia

[Rao-Blackwellized Monte Carlo data association for multiple target tracking](#), pp. 583-590  
Simo Särkkä, Helsinki University of Technology, Finland  
Aki Vehtari, Helsinki University of Technology, Finland

Jouko Lampinen, Helsinki University of Technology, Finland

[\*A new approach for the bearings-only problem: estimation of the variance-to-range ratio\*](#), pp. 591-598

Thomas Brehard, IRISA, France

Jean-Pierre Le Cadre, IRISA, France

[\*Sequential nonlinear tracking filter with range-rate measurements in spherical coordinates\*](#), pp. 599-605

Zhan-sheng Duan, Xi'an Jiaotong University, P.R. China

Chongzhao Han, Xi'an Jiaotong University, P.R. China

X. Rong Li, University of New Orleans, USA

### **[DSR1] Distributed fusion 1**

Chair: James Llinas, State University of New York at Buffalo, USA

[\*Bayesian network model for data incest in a distributed sensor network\*](#), pp. 606-613

Samuel McLaughlin, University of Melbourne, Australia

Vikram Krishnamurthy, University of British Columbia, Canada

Robin J. Evans, University of Melbourne, Australia

[\*Graphical models for nonlinear distributed estimation\*](#), pp. 614-621

Chee-Yee Chong, Alphatech, USA

Shozo Mori, Alphatech, USA

[\*Distributed fusion algorithms in embedded network on-line fusion system\*](#), pp. 622-628

Shouzhi Wei, Northeastern University, P.R. China

Hai Zhao, Northeastern University, P.R. China

Gang Wang, Northeastern University, P.R. China

Hui Liu, Northeastern University, P.R. China

### **[IMF2] Image fusion 2**

Chair: Mohammad Farooq, Royal Military College of Canada, Canada

[\*Fusion of distributions for radar clutter modeling\*](#), pp. 629-636

Erik P. Blasch, Air Force Research Laboratory, USA

Mike Hensel, Jacobs Sverdrup, USA

[\*Fusion of multispectral and SAR images by intensity modulation\*](#), pp. 637-643

Luciano Alparone, University of Florence, Italy

Luca Facheris, University of Florence, Italy

Stefano Baronti, CNR, Italy

Andrea Garzelli, University of Siena, Italy

Filippo Nencini, University of Siena, Italy

[\*SAR and optical images fusion algorithm based on wavelet transform\*](#), pp. 644-648

Yunfeng Wang, Sichuan University, P.R. China

Zhisheng You, Sichuan University, P.R. China

Jianguo Wang, University of Electronic Science and Technology of China, P.R. China

### **[ATO1] Data fusion and tracking in automotive active safety applications 1 (Special session)**

Chair: Angelos Amditis, National Technical University of Athens, Greece

[\*Precise vehicle localization using multiple sensors and natural landmarks\*](#), pp. 649-656

Ullrich Scheunert, Chemnitz University of Technology, Germany

Heiko Cramer, Chemnitz University of Technology, Germany

Gerd Wanielik, Chemnitz University of Technology, Germany

[\*Lane data fusion for driver assistance systems\*](#), pp. 657-663

Albrecht Klotz, Robert Bosch, Germany

Jan Sparbert, Robert Bosch, Germany

Dieter Hötzer, Robert Bosch, Germany

[\*Multi sensor data fusion using a generalized feature model applied to different types of extended road objects\*](#), pp. 664-671

Heiko Cramer, Chemnitz University of Technology, Germany

Ullrich Scheunert, Chemnitz University of Technology, Germany

Gerd Wanielik, Chemnitz University of Technology, Germany

### **[CLA2] Classification 2**

Chair: Kai F. Goebel, GE Global Research, USA

[Data quality based fusion: application to the land cover](#), pp. 672-679

V. Phan Luong, Université de Provence, France

T.T. Pham, Université de Provence, France

R. Jeansoulin, Université de Provence, France

[Attribute impact for a seismic image fusion system based on fuzzy rules](#), pp. 680-685

Lionel Valet, Université de Savoie, France

Gilles Mauris, Université de Savoie, France

[Information matrix fusion with feedback versus number of sensors](#), pp. 686-692

Qiao Xiangdong, Air Force Engineering University, P.R. China

Chang Kuochu, George Mason University, USA

### **[PTL1] Particle filtering 1**

Chair: Wolfgang Koch, FGAN, Germany

[Efficient particle-based track-before-detect in Rayleigh noise](#), pp. 693-700

Mark G. Rutten, Defence Science and Technology Organisation, Australia

Neil J. Gordon, Defence Science and Technology Organisation, Australia

Simon Maskell, Qinetiq, UK

[A particle filter multi target track before detect application: some special aspects](#), pp. 701-708

Yvo Boers, Thales Nederland, The Netherlands

Hans Driessen, Thales Nederland, The Netherlands

[Sequential Monte Carlo algorithms for joint target tracking and classification using kinematic radar information](#), pp. 709-716

Donka Angelova, Bulgarian Academy of Sciences, Bulgaria

Lyudmila Mihaylova, University of Bristol, UK

### **[DSR2] Distributed fusion 2**

Chair: Chee-Yee Chong, Alphatech, USA

[Bayesian track correlation and numbering](#), pp. 717-722

Egils Sviestins, Saab, Sweden

[Communication in general decentralized filters and the coordinated search strategy](#), pp. 723-730

Frederic Bourgault, University of Sydney, Australia

Hugh F. Durrant-Whyte, University of Sydney, Australia

[Communication issues in decentralized Kalman filters](#), pp. 731-738

Markus S. Schlosser, Universität Karlsruhe, Germany

Kristian Kroschel, Universität Karlsruhe, Germany

### **[IMF3] Image fusion 3**

Chair: Erik P. Blasch, Air Force Research Laboratory, USA

[Sensor fusion for video surveillance](#), pp. 739-746

Lauro Snidaro, University of Udine, Italy

Gian Luca Foresti, University of Udine, Italy

Ruixin Niu, Syracuse University, USA

Pramod K. Varshney, Syracuse University, USA

[Background information fusion and its application in video target tracking](#), pp. 747-753

Yuxi Chen, Xi'an University of Architecture and Technology, P.R. China

Chongzhao Han, Xi'an Jiaotong University, P.R. China

Xin Kang, Xi'an Jiaotong University, P.R. China

Mingjun Wang, Xi'an University of Architecture and Technology, P.R. China

[A background reconstruction algorithm based on pixel intensity classification in remote video surveillance system](#), pp. 754-759

Zhiqiang Hou, Xi'an Jiaotong University, P.R. China

Dave Lawless, Charles River Analytics, USA  
Reed Hoyt, US Army Research Institute of Environmental Medicine, USA  
Steve Muza, US Army Research Institute of Environmental Medicine, USA

[Dispatching/routing of emergency vehicles in a disaster environment using data fusion concepts](#), pp. 967-974

Qiang Gong, State University of New York at Buffalo, USA  
Arun Jotshi, State University of New York at Buffalo, USA  
Rajan Batta, State University of New York at Buffalo, USA

### **[PNL2] Panel discussion on Dezert-Smarandache theory**

[Panel discussion on Dezert-Smarandache theory](#), p. 975

Organizer: International Society of Information Fusion (ISIF)  
Moderators: James Llinas, State University of New York at Buffalo, USA, Éloi Bossé, Defence Research and Development Canada, Canada

Participants:

*Introduction to DSMT for information fusion*  
Jean Dezert, ONERA, France

*Is DSMT a reasonable alternative to DST?*  
Rolf Haenni, University of Konstanz, Germany

**[IIF1] Image & Information Fusion 1 (Special session)**

Chair: Allen M. Waxman, Alphatech, USA

[\*Information fusion for feature extraction and the development of geospatial information\*](#), pp. 976-982

Michael A. O'Brien, National Geospatial-Intelligence Agency, USA  
John M. Irvine, SAIC, USA

[\*Multisensor image fusion, mining and reasoning: rule sets for higher-level AFE in a COTS environment\*](#), pp. 983-990

Marianne Chiarella, Alphatech, USA  
David A. Fay, Alphatech, USA  
Richard T. Ivey, Alphatech, USA  
Neil A. Bomberger, Alphatech, USA  
Allen M. Waxman, Alphatech, USA

[\*Fusion of texture measures for urban area characterization\*](#), pp. 991-998

Giovanna Trianni, University of Pavia, Italy  
Marika Tosi, University of Pavia, Italy  
Fabio Dell'Acqua, University of Pavia, Italy  
Paolo Gamba, University of Pavia, Italy

**[GTT2] Ground Target Tracking and Classification 2 (Special session)**

Chair: Mahendra Mallick, Lockheed Martin Orincon, USA

[\*Plot-to-track correlation in A-SMGCS using the target images from a surface movement radar\*](#), pp. 999-1005

Giovanni Golino, AMS, Italy  
Alfonso Farina, AMS, Italy

[\*Ten ways to fuse GMTI and HRRR measurements for joint tracking and identification\*](#), pp. 1006-1013

Erik P. Blasch, Air Force Research Laboratory, USA  
Chun Yang, Sigtem Technology, USA

[\*The minimum risk angle for automatic target recognition using the intersecting cortical model\*](#), pp. 1014-1021

Nils Zetterlund, Royal Institute of Technology, Sweden  
Thomas Lindblad, Royal Institute of Technology, Sweden  
Ulf Ekblad, Royal Institute of Technology, Sweden

**[STH2] Situation, Threat and High-Level fusion 2**

Chair: Martin G. Oxenham, Defence Science and Technology Organisation, Australia

[\*Improving situation awareness using aerial-mission recognition and temporal information\*](#), pp. 1022-1029

Maria Andersson, Swedish Defence Research Agency, Sweden  
Göran Pettersson, Swedish Defence Research Agency, Sweden

[\*Iterative information fusion using a reasoner for objects with uninformative belief values\*](#), pp. 1030-1037

S.K. Chang, University of Pittsburgh, USA  
Erland Jungert, Swedish Defence Research Agency, Sweden

[\*A general situation assessment model based on rule extraction\*](#), pp. 1038-1043

Xiao-dan Zhang, Northeastern University, P.R. China  
Hai Zhao, Northeastern University, P.R. China  
Zhan-sheng Duan, Xi'an Jiaotong University, P.R. China

**[ASO1] Association 1**

Chair: Ivan Kadar, Interlink Systems Sciences, USA

[\*Multi-target out-of-sequence data association\*](#), pp. 1044-1051

Simon Maskell, Qinetiq, UK  
Richard Everitt, Qinetiq, UK  
Robert Wright, Qinetiq, UK  
Mark Briers, Qinetiq, UK

[\*A probabilistic strongest neighbor filter algorithm for m validated measurements\*](#), pp. 1052-1058

Taek Lyul Song, Hanyang University, Korea  
Kye Jin Rhee, LG Innotek, Korea  
Dong Gwan Lee, Hanyang University, Korea

[\*Association matrix generation for sensor data fusion\*](#), pp. 1059-1065  
Michele Bierbaum, Johns Hopkins University, USA

### **[IIF2] Image & Information Fusion 2 (Special session)**

Chair: Allen M. Waxman, Alphatech, USA

[\*Colorizing grayscale intensified nightvision images\*](#), pp. 1066-1071  
Alexander Toet, TNO, The Netherlands

[\*Hybrid fused displays: between pixel- and region-based image fusion\*](#), pp. 1072-1079  
S.G. Nikolov, University of Bristol, UK  
J.J. Lewis, University of Bristol, UK  
R.J. O'Callaghan, University of Bristol, UK  
D.R. Bull, University of Bristol, UK  
C.N. Canagarajah, University of Bristol, UK

[\*A Multiple-Hypothesis Tracking of Multiple Ground Targets from Aerial Video with Dynamic Sensor Control\*](#), pp. 1080-1087

Pablo Arambel, Alphatech, USA  
Matthew Antone, Alphatech, USA  
Constantino Rago, Alphatech, USA  
Herbert Landau, Alphatech, USA  
Thomas Strat, Defense Advanced Research Projects Agency, USA

### **[GTT3] Ground Target Tracking and Classification 3 (Special session)**

Chair: Mahendra Mallick, Lockheed Martin Orincon, USA

[\*Ground target classification using combined radar and IR with simulated data\*](#), pp. 1088-1095

Andris Lauberts, Swedish Defence Research Agency, Sweden  
Mikael Karlsson, Swedish Defence Research Agency, Sweden  
Fredrik Näsström, Swedish Defence Research Agency, Sweden  
Rahman Aljasmí, Swedish Defence Research Agency, Sweden

[\*Distributed data fusion in a ground sensor network\*](#), pp. 1096-1103

Mikael Brännström, Swedish Defence Research Agency, Sweden  
Ron Lennartsson, Swedish Defence Research Agency, Sweden  
Andris Lauberts, Swedish Defence Research Agency, Sweden  
Hans Habberstad, Swedish Defence Research Agency, Sweden  
Erland Jungert, Swedish Defence Research Agency, Sweden  
Martin Holmberg, Swedish Defence Research Agency, Sweden

[\*Multi target tracking of ground targets in clutter with LMIPDA-IMM\*](#), pp. 1104-1110

Darko Musicki, University of Melbourne, Australia  
Sofia Suvorova, Defence Science and Technology Organisation, Australia  
Subhash Challa, University of Technology Sydney, Australia

### **[STH3] Situation, Threat and High-Level fusion 3**

Chair: Johan Schubert, Swedish Defence Research Agency, Sweden

[\*A Bayesian blackboard for information fusion\*](#), pp. 1111-1116

Charles Sutton, University of Massachusetts, USA  
Clayton Morrison, USC Information Sciences Institute, USA  
Paul R. Cohen, USC Information Sciences Institute, USA  
Joshua Moody, USC Information Sciences Institute, USA  
Jafar Adibi, USC Information Sciences Institute, USA

[\*Support for situation awareness in command and control\*](#), pp. 1117-1124

Klas Wallenius, Royal Institute of Technology, Sweden

[\*Bayesian games for threat prediction and situation analysis\*](#), pp. 1125-1132  
Joel Brynielsson, Royal Institute of Technology, Sweden  
Stefan Arnborg, Royal Institute of Technology, Sweden

**[ASO2] Association 2**

Chair: Henry Leung, University of Calgary, Canada

[\*Evaluation of data association hypotheses: non-Poisson I.I.D. cases\*](#), pp. 1133-1140  
Shozo Mori, Alphatech, USA  
Chee-Yee Chong, Alphatech, USA

[\*An efficient approach to decompose the multidimensional assignment problem\*](#), pp. 1141-1149  
Huub W. de Waard, Thales Naval Nederland, The Netherlands  
Agostino Capponi, Thales Naval Nederland, The Netherlands

[\*A polynomial time algorithm for the multidimensional assignment problem in multiple sensor environments\*](#), pp. 1150-1157  
Agostino Capponi, Thales Naval Nederland, The Netherlands  
Huub W. de Waard, Thales Naval Nederland, The Netherlands

**[REL1] Reliability in Information fusion 1 (Special session)**

Chair: Galina Rogova, Encompass Consulting, USA

[\*Reliability in information fusion: literature survey\*](#), pp. 1158-1165  
Galina L. Rogova, Encompass Consulting, USA  
Vincent Nimier, ONERA, France

[\*Information evaluation: a formalisation of operational recommendations\*](#), pp. 1166-1171  
Vincent Nimier, ONERA, France

[\*Assessing the reliability of open source information\*](#), pp. 1172-1178  
David F. Noble, Evidence Based Research, USA

**[GTT4] Ground Target Tracking and Classification 4 (Special session)**

Chair: Mahendra Mallick, Lockheed Martin Orincon, USA

[\*Differential geometry measures of nonlinearity with applications to ground target tracking\*](#), pp. 1179-1186  
Mahendra Mallick, Lockheed Martin Orincon, USA

[\*Sensor Resource Management with Hierarchical Target Valuation Models\*](#), pp. 1187-1194  
Joe P. Hill, Alphatech, USA  
K.C. Chang, George Mason University, USA

[\*Ground surveillance and fusion of ground target sensor data in a network based defense\*](#), pp. 1195-1201  
Håkan Warston, Ericsson Microwave Systems, Sweden  
Hans Persson, Ericsson Microwave Systems, Sweden

**[STH4] Situation, Threat and High-Level fusion 4**

Chair: Éloi Bossé, Defence Research and Development Canada, Canada

[\*Bridging the gap between information need and information acquisition\*](#), pp. 1202-1209  
L. Ronnie M. Johansson, Royal Institute of Technology, Sweden  
Robert Suzic, Swedish Defence Research Agency, Sweden

[\*An approach to integrated cognitive fusion\*](#), pp. 1210-1217  
Gabriel Jakobson, Altusys, USA  
Lundy Lewis, Southern New Hampshire University  
John Buford, Altusys, USA

[\*Revisions and extensions to the JDL data fusion model II\*](#), pp. 1218-1230  
James Llinas, State University of New York at Buffalo, USA  
Christopher Bowman, Consultant, USA  
Galina L. Rogova, Encompass Consulting, USA  
Alan Steinberg, Utah State University, USA  
Ed Waltz, General Dynamics Advanced Information, USA  
Frank White, US Navy Spawar Systems Center, USA

### **[ASO3] Association 3**

Chair: Hedvig Sidenbladh, Swedish Defence Research Agency, Sweden

[\*Assignment costs for multiple sensor track-to-track association\*](#), pp. 1231-1237

Lance M. Kaplan, Clark Atlanta University, USA

William D. Blair, Georgia Tech Research Institute, USA

[\*A neural network based approach for ESM/radar track association\*](#), pp. 1238-1244

Yifeng Zhou, Defence Research and Development Canada, Canada

Jim Mickeal, Defence Research and Development Canada, Canada

Barbara Ford, Defence Research and Development Canada, Canada

[\*MCMC data association algorithm applied to the French over-the-horizon radar\*](#)

[\*Nostradamus\*](#), pp. 1245-1250

David Bourgeois, ENSEA, France

Christèle Morisseau, ONERA, France

Marc Flécheux, ONERA, France

### **[REL2] Reliability in Information fusion 2 (Special session)**

Chair: Galina Rogova, Encompass Consulting, USA

[\*Automated association of track information from sensor sources with non-sensor information in the context of maritime surveillance\*](#), pp. 1251-1256

Eric Lefebvre, Lockheed Martin Canada, Canada

Christopher Helleur, Defence Research and Development Canada, Canada

[\*Reliability of PDA based target tracking in clutter\*](#), pp. 1257-1262

Darko Musicki, University of Melbourne, Australia

Xuezhi Wang, University of Melbourne, Australia

[\*Robustness analysis at the technical level of situation assessment\*](#), pp. 1263-1268

Xuezhi Wang, University of Melbourne, Australia

Gavin Thoms, University of Melbourne, Australia
